

AEWA

European Goose Management Platform - National Report 2021

As outlined in Rule 32 of the Modus Operandi of the European Goose Management International Working Group (EGM IWG) adopted at the 1st Meeting of the Working Group (EGM IWG1) in December 2016, reports on the implementation of the AEWA International Species Action and Management Plans within the remit of the European Goose Management Platform (EGMP) shall be prepared by each Range State, according to a format agreed by the EGM IWG, and be presented at each face-to-face meeting of the EGM IWG.

These National Reports are also expected to provide the basis for the reporting obligations of the EGM IWG to the AEWA bodies (Modus Operandi Rule 33).

As such, countries are invited to report on their implementation progress and provide information and data as available, regarding the International Action and Management Plans to which they are a Principle Range State using the following template.

Scope of National Reports

The scope of the National Reports is on activities foreseen in the respective Action and Management Plans as well as the implementation of adaptive harvest management programmes. In addition, reporting on other tasks as decided by the EGM IWG in terms of implementation, are included as necessary.

Data provision to the EGMP Data Center

It should be noted that data required for the adaptive harvest management processes running under the EGMP are **not** to be included in the template. As indicated in document AEWA/EGM/ IWG 2.10, presented to the EGM IWG at the 2nd EGM IWG meeting in Copenhagen in June 2017, all metadata and information on the monitoring activities on the population size, demographics, harvest levels and derogation numbers, will be submitted by Range States separately directly to the EGMP Data Centre.

Reporting structure

The National Report template encompasses five sections.

I. General information

II. General non-species-specific reporting

III. Reporting on the implementation of the International Species Management Plan for the Svalbard population of the Pink-footed Goose, following the structure of the four main objectives of the plan

Reporting of the implementation of the International Single Species Action Plan for the Conservation of the Taiga Bean Goose, based on the structure of the biannual implementation plan agreed at the 1st EGM IWG meeting in Kristianstad, Sweden in December 2016.

The Taiga Bean Goose template is divided into two sub-sections according to Management Units:

IV. Sub-section A: Eastern 1 Management Unit

V. Sub-section B: Western and Central Management Units

Please note that country-specific questions are indicated (see bold text in square brackets under the questions) and only need to be answered by the respective countries.

Deadline for submission

The final deadline for submission of the National Reports to the Secretariat is set for **Friday 30 April 2021**.

I. General information

To be completed by all Range States

II. General non-species-specific reporting

To be completed by all Range States

II.1. Are you monitoring the level of agricultural conflict (damage, complaints) with geese in your country on national (centralized for the entire country), regional(sub-national) or local level?

(PfG ISMP p.33, Objective II / 4+5)

Please select only one option

- Yes
 No
 Not relevant

Please indicate the level:

Possibility for multiple options

- National (centralized for the entire country)
 Regional (sub-national)
 Local

National (centralized for the entire country) monitoring

Please provide details on the national monitoring methods, units, frequency and the coverage

>>>

Are these national activities species-specific?

Please select only one option

- Yes
 No

Please list the species

>>>

Regional (sub-national) monitoring

Please provide details on the regional monitoring methods, units, frequency and the coverage

>>> Regional: limited to Flanders, the northern part of Belgium, where also most geese are wintering. Farmers can get a compensation for significant damage from wintering geese (and in some cases the breeding population) to crops. Numbers of cases and total damage paid is centralised.

Are these regional activities species-specific?

Please select only one option

- Yes
 No

Please list the species

>>>

Local monitoring

Please provide details on the local monitoring methods, units, frequency and the coverage

>>>

Are these local activities species-specific?

Please select only one option

- Yes
 No

Please list the species

>>>

Please explain the reasons

>>>

Please explain the reasons

>>>

II.2. What management measures does your country apply to manage agricultural conflicts related to geese on national (centralized for the entire country), regional (sub-national) or local level?

(PfG ISMP p. 33, Objective II / 4+5)

Possibility for multiple options

- No agricultural conflict related to geese has been recorded in my country
- No management measures are applied to manage agricultural conflicts related to geese
- Compensation schemes (payments to farmers for losses e.g. crop damage)
- Subsidy schemes (payments to support farmers to provide for/tolerate geese on their land, replacing agricultural use)
- Scaring schemes or other preventive measures designed to actively keep geese away from farmland
- Designation of goose foraging areas (accommodation areas)
- Derogation shooting to keep geese away from sensitive crops and to reduce population size
- Any other management measures to alleviate agricultural conflict

No management measures are applied

Please explain the reasons

>>>

Compensation schemes (payments to farmers for losses e.g. crop damage)

Please indicate the level at which the schemes are applied

Possibility for multiple options

- National (centralized for the entire country)
- Regional (sub-national)
- Local

Please explain how the damage (yield loss) is determined

>>> Flanders: the crop damage is assessed during the growing season. The reduction in the harvest is measured and compared to reference fields and then paid out on base of market prices at the moment of harvest.

Are these schemes species-specific?

Please select only one option

- Yes
- No

Please provide details on the species-specific measures

>>>

Please provide any other details (e.g. results), if available

>>>

Please explain the reasons

>>> The compensation scheme is the same for all damage by protected species and proscribed by law. Depending on the type of damage, the compensation can be assessed in another way (e.g. damage to buildings cf. damage to crops).

For crop damage, damage by huntable species is normally not paid for by the authorities as it is the responsibility of the hunter. For protected non-huntable species, the modus operandi is not species-specific as it doesn't really matter what exact protected species caused it, as long if it's clear it was a protected species.

Is the effectiveness of this scheme evaluated?

Please select only one option

- Yes
- No

Please provide details on the evaluation of effectiveness

>>>

Please provide any other details (e.g. results), if available

>>>

Please explain the reasons

>>> No real evaluation. But through the contacts with farmers and farmers organisations the compensation scheme is considered as a fair way to tackle the conflicts.

Subsidy schemes (payments to support farmers to provide for/tolerate geese on their land, replacing agricultural use)

Please indicate the level at which subsidy schemes are provided

Possibility for multiple options

- National (centralized for the entire country)
- Regional (sub-national)
- Local

Please provide details on the subsidy schemes

>>>

Are these schemes species-specific?

Please select only one option

- Yes
- No

Please provide details on the species-specific measures

>>>

Please provide any other details (e.g. results) if available

>>>

Please explain the reasons

>>>

Is the effectiveness of this scheme evaluated?

Please select only one option

- Yes
- No

Please provide details on the evaluation of effectiveness

>>>

Please provide any other details (e.g. results) if available

>>>

Please explain the reasons

>>>

Scaring schemes or other preventive measures designed to actively keep geese away from farmland

Please indicate the level of the schemes

Possibility for multiple options

- National (centralized for the entire country)
- Regional (sub-national)
- Local

Please provide details on the scaring schemes or other preventive measures

>>> Scaring is done cf. the legally prescribed best practice and is an obligatory first step in order to be able to get compensation or derogation.

Is the effectiveness of this scheme evaluated?

Please select only one option

- Yes
- No

Please provide details on the evaluation of effectiveness

>>> The geese get used to scaring devices quite quickly. So it often is not enough to really prevent the damage.

Please provide any other details (e.g. results) if available

>>>

Please explain the reasons

>>>

Designation of goose foraging areas (accommodation areas)

Please provide details on the foraging areas (accommodation areas)

>>> In important areas for wintering water birds (mainly geese or ducks) all hunting is closed after 15 november. In these areas, no scaring is needed in order to get crop damage compensation.

Please indicate at which level the foraging areas are designated

Possibility for multiple options

- National (centralized for the entire country)
- Regional (sub-national)
- Local

Is the effectiveness of accommodation areas evaluated?

Please select only one option

- Yes
- No

Please provide details on the evaluation of effectiveness

>>> The designated areas remain the main cores for wintering geese.

Please provide any other details (e.g. results), if available

>>>

Please explain the reasons

>>>

Derogation shooting to keep geese away from sensitive crops and to reduce population size

Please provide species-specific details on the derogation shooting

>>> Derogation shooting is only allowed for geese with an open hunting season: greylag goose and Canada goose.

Please indicate the application level of the derogation shooting

Possibility for multiple options

- National (centralized for the entire country)
- Regional (sub-national)
- Local

Is the effectiveness of derogation shooting evaluated?

Please select only one option

- Yes
- No

Please provide details on the evaluation of effectiveness

>>> Derogation shooting generally helps to reduce the impacts (damage) on the local scale and is mainly scaring by shooting with little impact on population.

Please provide any other details (e.g. results), if available

>>> Derogation shooting is usually practiced for damage during the growing/breeding season; the local birds (greylag goose, Canada goose, ...) adapt quickly to the possible danger and avoid the area where derogation is issued. In winter derogation is rarely used because damage is mostly due to non-huntable species or huntable species mixed with other species.

Please explain the reasons

>>>

Any other management measures taken to alleviate agricultural conflicts

Please provide details on the management measures that are taken

>>>

Please indicate the level of the measures

Possibility for multiple options

- National (centralized for the entire country)
- Regional (sub-national)
- Local

Are these measures species-specific?

Please select only one option

- Yes
- No

Please give details on the species-specific measures

>>>

Please provide brief details (attach file or provide weblink)

>>>

Please explain the reasons

>>>

Is the effectiveness of these measures evaluated?

Please select only one option

- Yes
- No

Please provide details on the evaluation of effectiveness

>>>

Please provide any other details (e.g. results), if available

>>>

Please explain the reasons

>>>

II.3. Has your country developed new or adjusted existing legislation to facilitate the implementation of adaptive harvest management within the framework of an ISSAP or ISSMP?

(TBG ISSMP; PfG ISSMP)

Please select only one option

- Yes
- The legislation has been reviewed and no need to adjust existing or develop new legislation has been identified
- No, but the development of new or adjustment of existing legislation is currently under political discussion
- No, but the development of new or adjustment of existing legislation is currently under technical discussion
- The legislation has not been reviewed yet for any possible need of adjustment or development of new legislation
- Other

Please provide details on the new legislation or the adjustments to existing legislation and the issues addressed

>>>

Please attach the legislation

Please indicate if you have used the Guidance on Implementation of AHM through Domestic Legal Regulations (adopted at EGM IWG3)

Please select only one option

- Yes
- No

Please explain what other guidance has been used instead

>>>

Please provide details

>>> For the moment for Belgium there's no role in the process to increase or adapt hunting quota. The current

hunting legislation and damage compensation schemes suffice to address the problems.

Is there an anticipated date to conclude considerations related to development or adjustment of legislation related to AHM within your country

>>>

Is there an anticipated date to conclude considerations related to development or adjustment of legislation related to AHM within your country

>>>

Please explain the reasons

>>>

Please specify

>>>

III. Pink-footed Goose International Species Management Plan (PFG ISMP)

Participating Range States: Belgium, Denmark, the Netherlands, Norway

General Implementation

III.1. Does your country have a national (centralized for the entire country), regional (sub-national) or local management plan for the Pink-footed Goose?

(PFG ISMP, p. 29; Objective II+IV/6)

Please select only one option

- Yes, adopted and being implemented
- Yes, adopted but not being implemented
- A plan(s) is/are being developed
- No

Please indicate the level of the plan

Possibility for multiple options

- National (centralized for the entire country)
- Regional (sub-national)
- Local

Please select only one option

Yes

No

Please provide more details on the planned activities

>>>

Please explain the reasons

>>>

Please indicate why the plan is not being implemented

>>>

Please indicate the timeline for the finalization of the plan

>>>

Please indicate when it is expected to be adopted

>>>

Please indicate the level of the plan(s) (National, regional, local)

>>>

Please explain the reasons

>>> On the regional level (Flanders) there has been a decision on the population targets and the surface of habitat to accommodate this population target (Decision of the Flemish Government of 23 July 2010 on the regional conservation targets for the European Birds and Habitats Directives species and habitats). Both are decided from a species conservation point of view, in order to keep the wintering sites in a good state for the species. The species is not huntable in Flanders so not management/shooting of the species is involved.

Field for additional information on management plan/s (optional)

>>> The regional targets are worked out in more detail in the specific conservation targets for the relevant SPA Poldercomplex (Decision of the Flemish Government of 23 April 2014).

III.2. Has your country established a working group to support the implementation of the PfG ISMP?

(PfG ISMP, p. 29, Objective I+II+III+IV/1)

Please select only one option

- Yes, a working group has been established
- The establishment of a working group is under consideration
- No

Please indicate the type of working group that has been established

Possibility for multiple options

- National (centralized for the entire country)
- Regional (sub-national)
- Local

National working group

Please indicate the date of establishment

>>>

Please list the working group members and coordinator

>>>

Please provide details about the functions of the working group

>>>

Please provide a main contact

>>>

Regional working group

In case of multiple regional working groups, please upload a document or table listing all the working groups, including the details required in the sections below

>>> Flemish working group on the implementation of the international goose management.

Please indicate the region the working group services

>>> Flanders

Please indicate the date of establishment

>>> The working group was established in 2013, parallel with the international working group.

Please list the working group members and coordinator

>>> Coördinator: Floris Verhaeghe (Agency of Nature and Forest)

Members: representatives of nature conservation NGO's, farmers organisations, hunters, government representatives dealing with goose damage and goose experts.

Please provide details about the functions of the working group

>>> The working group evaluates the Flemish situation with regards to wintering geese and goose-damage and prepares the national point of view for the EGMP-working group.

Please provide a main contact

>>> Floris Verhaeghe

Local working group

In case of multiple local working groups, please upload a document or table listing all the working groups, including the details require in the sections above

>>>

Please indicate the area the working group services

>>>

Please indicate the date of establishment

>>>

Please list the working group members and coordinator

>>>

Please provide details about the functions of the working group

>>>

Please provide a main contact

>>>

Please indicate by when a decision on the establishment will be taken

>>>

Please indicate which existing structure or capacity is responsible for the implementation of the PfG ISMP instead

>>>

Field for additional information on working group (optional)

>>> The working group comes together in spring, evaluating the wintering season and preparing points of view for the EGMP working group later in spring.

Objective I. Maintain a sustainable and stable Pink-footed Goose population and its range

III.3. Have key sites for the Pink-footed Goose been identified in your country?

(PfG ISMP, p. 32, Objective I/4)

Please select only one option

Yes

No

Please upload an Excel table and include specific information for each site on the following items

- 1 Country
 - 2 Site
 - 3 Size (ha)
 - 4 Location (decimal geographic coordinates; and separately upload a map indicating roost and main foraging areas if possible)
 - 5 Main habitat types
 - 6 Has this site been afforded appropriate designation status at international levels (e.g. Ramsar site, SPA, etc.)?
 - 6a Designation status
 - 6b Date of designation
 - 6c Any other relevant information
 - 7 Has this site been afforded appropriate protected area status at national levels?
 - 7a Designation status
 - 7b Date of designation
 - 7c Any other relevant information
 - 8 Does a management plan exist that address the conservation requirements of pink-footed geese?
 - 8a Provide brief details e.g. about the hunting regulations and other management regimes
- >>> Hunting in this area is possible until the 15th of november, when larger numbers of wintering waterbirds

arrive.

You have attached the following documents to this answer.

[Sheet_Pinkfeet_SPA_Poldercomplex.xlsx](#) - SPA Poldercomplex information

Please explain the reasons

>>>

III.4. Are measures being taken to restore and/or rehabilitate Pink-footed Geese roosting and/or feeding habitats?

(PfG ISMP, p. 33, Objective I+II/7)

Possibility for multiple options

- In staging areas
- In the wintering areas
- Not relevant

In the staging areas

Please provide brief details, listing sites and measures

>>>

In the wintering areas

Please provide brief details, listing sites and measures

>>> Restoring extensive areas of wet grasslands with micro-relief.

Please explain the reasons

>>>

III.5. Has a programme for prevention of Pink-footed Goose breeding on mainland been developed and implemented in your country?

(PfG ISMP, p. 31, Objective I+II+II/2)

[only for Norway]

Please select only one option

- Yes, the programme is being implemented
- Yes, but the programme is not being implemented to date
- No, but a programme is under development
- No

Please provide information on measures taken to date

>>>

Please provide results, if available

>>>

Please provide brief details on the measures and timeline of the programme

>>>

Please explain why it has not been implemented

>>>

Please provide brief details and expected date of enacting it

>>>

Please provide details on any other relevant activities undertaken, if any

>>>

Keep agricultural conflicts to an acceptable level

III.6. Are agricultural conflicts related to Pink-footed Geese (e.g. crop damage) currently at an acceptable level within your country?

(PfG ISMP, p. 33, Objective II / 4+5)

Please select only one option

- Yes
- No

Please indicate how these conflicts are being addressed

>>> Nature reserves are being managed in order to be as attractive as possible to accommodate the larger number of pinkfeet.

There is also a damage compensation scheme when pinkfeet damage crops outside these nature reserves. This is considered as a fair deal by the farmers .

Please indicate how these conflicts are being addressed

>>>

Please provide further details, as necessary

>>>

Objective III. Avoid increase in tundra vegetation degradation on the breeding range

III.7. Is the extent of arctic tundra degradation on Svalbard caused by the Pink-footed Goose monitored?

(PFG ISMP, p. 33-34, Objective III /8)

[only for Norway]

Please select only one option

Yes

No

Please provide details on the type of monitoring activities (who is conducting them and how they are conducted)

>>>

Is there an increase in the level of degradation of the arctic tundra?

Please select only one option

Yes

No

Please provide any results or evidence

>>>

Please provide any results or evidence

>>>

Please explain the reasons

>>>

Objective IV. Allow for recreational use that does not jeopardize the population

III.8. Does your country promote and/or implement (in the past three years) any national or regional (sub-national) hunting-related campaigns, training programmes and/or management activities ?

(PFG ISMP, p. 31, Objective VI/3)

[only Norway and Denmark]

Possibility for multiple options

Wise use hunting practices

Best practices to reduce crippling rates

Self-organization and coordination of local hunting

No campaigns, programmes or activities have been implemented

Wise use hunting practices

Please provide brief details (attach files or provide web links, if available)

>>>

Best practices to reduce crippling rates

Please provide brief details (attach files or provide web links, if available)

>>>

Self-organization and coordination of local hunting

Please provide brief details (attach files or provide web links, if available)

Please explain the reasons

>>>

Optionally, please provide any other information related to the implementation of the PFG ISMP

Please provide further information here

>>>

IV. Sub-section A: Taiga Bean Goose International Single Species Action Plan (TBG ISSAP) - Eastern 1 Management Unit

Participating Range States: **Belarus, Estonia, Germany, Latvia, Ukraine**

Objective 1. Increase survival rate of adults

Result 1.1 Legal harvest does not jeopardize an increase of adult survival rates

IV.1. Has your country developed and adopted legislation for the closure of hunting of TBG to allow for TBG to pass before goose hunting is opened?

(activity 1.1.1.1 Workplan for the implementation of non-AHM related actions (2018-2020) agreed at the 3rd EGM IWG meeting in Leeuwarden, the Netherlands in June 2018)

[all Participating Range States]

Please select only one option

- Yes, developed and adopted
- Yes, developed but not adopted
- No

Please describe what legislation has been developed

>>>

Please indicate when it was adopted

>>>

Please indicate how the legislation is enforced

>>>

Please describe what legislation has been developed

>>>

Please indicate the timeframe when the legislation is expected to be adopted

>>>

Please explain the reasons

>>>

IV.2. Please indicate how you are improving the knowledge of the occurrence of TBG on sub-species level in your country

(activity 1.1.1.2 Workplan for the implementation of non-AHM related actions (2018-2020) agreed at the 3rd EGM IWG meeting in Leeuwarden, the Netherlands in June 2018)

[all Participating Range States]

IV.2.1. Ensuring national monitoring at all known key sites

Please select only one option

- Yes
- No

Please describe the activities undertaken

>>>

Please list the key sites where monitoring activities are being undertaken

>>>

Please provide relevant documents or weblinks

>>>

Please explain the reasons

>>>

IV.2.2. Providing identification training to people carrying out the monitoring activities

Please select only one option

- Yes

No

Please describe the activities undertaken

>>>

Please provide relevant identification materials or weblinks, if available

>>>

Please explain the reasons

>>>

IV.2.3. Providing equipment to people carrying out the monitoring activities

Please select only one option

Yes

No

Please describe the activities undertaken

>>>

Please provide relevant documents or weblinks

>>>

Please explain the reasons

>>>

IV.2.4. Carrying out a satellite/GPS tagging project on TBG in the wintering/staging areas

Please select only one option

Yes

No

Please describe the activities undertaken

>>>

Please provide relevant documents or weblinks

>>>

Please explain the reasons

>>>

IV.2.5. Any other relevant activities

Please select only one option

Yes

No

Please describe the activities undertaken

>>>

Please provide relevant documents or weblinks

>>>

Result 1.2 Illegal harvest is reduced to non-significant levels

IV.3. Does your country implement an awareness-raising campaign for hunters to complement necessary legislation changes?

(activity 1.2.2.1 Workplan for the implementation of non-AHM related actions (2018-2020) agreed at the 3rd EGM IWG meeting in Leeuwarden, the Netherlands in June 2018)

[Only for Belarus and Ukraine]

Please select only one option

Yes, an awareness-raising campaign is being implemented

No, but an awareness-raising campaign is under development

No

Please indicate who is involved in the implementation (e.g. national NGOs, research institutes, etc.)

>>>

Please provide brief details about the activities that are being implemented

>>>

Please provide a weblink or upload more information on the campaign

>>>

Does the campaign include guidance on identification of grey geese?

Please select only one option

Yes

No

Please upload identification guides and provide weblinks

>>>

Please provide further information, if available

>>>

Please explain the reasons

>>>

Please indicate who is in charge of developing the campaigns

>>>

Please provide information on when the development is expected to be finalized

>>>

Please indicate when the implementation of the campaign is envisaged to start

>>>

Please provide reasons why an awareness-raising campaign is not in place

>>>

IV.4. Has special publication on the occurrence of the Taiga Bean Goose been produced and disseminated?

(activity 1.2.2.2 Workplan for the implementation of non-AHM related actions (2018-2020) agreed at the 3rd EGM IWG meeting in Leeuwarden, the Netherlands in June 2018)

[Only for Ukraine]

Please select only one option

Yes produced and disseminated

Yes, currently being produced

No

Please provide details on dissemination, upload publication or provide weblink

>>>

Please provide details on the timeframe

>>>

Please indicate who is in charge of producing the publication

>>>

V. Sub-section B: Taiga Bean Goose International Single Species Action Plan (TBG ISSAP) - Western and Central Management Units

Participating Range States: **Denmark, Finland, Norway, Sweden, UK**

Objective 1 Increase survival rate of adults

Result 1.2 Illegal harvest is reduced to non-significant levels

V.1. Is TBG shooting investigated in north-east Jutland and Zealand?

(activity 1.2.2.1 Workplan for the implementation of non-AHM related actions (2018-2020) agreed at the 3rd EGM IWG meeting in Leeuwarden, the Netherlands in June 2018)

[Only for Denmark]

Please select only one option

- Yes
 No

Please indicate what activities have been undertaken

>>>

Please provide results, relevant publications and weblinks

>>>

Please explain the reasons

>>>

Result 1.3: Impact of huntable native predators in breeding and moulting areas is reduced

V.2. Are annual campaigns undertaken amongst hunters in the breeding areas to strengthen fox management in your country?

(activity 1.3.1.1 Biannual Taiga Bean Goose implementation plan agreed at the 1st EGM IWG meeting in Kristianstad, Sweden in December 2016)

[Only for Finland]

Please select only one option

- Yes
 No

Please list the areas where the campaigns are being undertaken

>>>

Please list the hunting associations involved

>>>

Please provide any other relevant details and weblinks

>>>

Please explain the reasons

>>>

V.3. Has fox management in northernmost Finland been further strengthened by the Finnish Wildlife Agency and the Forestry and Parks Service?

(activity 1.3.1.2 Biannual Taiga Bean Goose implementation plan agreed at the 1st EGM IWG meeting in Kristianstad, Sweden in December 2016)

[Only for Finland]

Please select only one option

- Yes
 No

Please explain what activities have taken place

>>>

Please provide results, relevant publications and weblinks

>>>

Please explain the reasons

>>>

Result 1.4: Impact of alien predators in breeding and moulting areas is reduced

V.4. Does your country implement programmes for the eradication of the raccoon dog?

(activity 1.4.1.1 Workplan for the implementation of non-AHM related actions (2018-2020) agreed at the 3rd EGM IWG meeting in Leeuwarden, the Netherlands in June 2018)

[Only for Finland and Sweden]

Please select only one option

Yes

No

Please provide details about the eradication programme(s) (scope, implementing entities, etc.)

>>>

Please provide details on the effectiveness of the programmes

>>>

Please provide an update on the current status of the raccoon dog

>>>

Please explain the reasons

>>>

Objective 2. Increase reproductive rates

Result 2.2: Intraspecific competition in spring staging areas is reduced

V.5. Please provide updates on the implementation of the “fields for geese” programme

(activity 2.2.1.1 Workplan for the implementation of non-AHM related actions (2018-2020) agreed at the 3rd EGM IWG meeting in Leeuwarden, the Netherlands in June 2018)

[Only for Sweden]

>>>

V.6. Please provide information on the continuation and implementation of the “unharvested-fields-for-birds” programme (within the Common Agricultural Policy)

(activity 2.2.1.2 and 2.2.1.3)

[Only for Finland]

>>>

Objective 3. Stop ongoing loss, fragmentation and degradation of habitats, and restore lost, fragmented and degraded habitats

Result 3.1: Impact of forestry works is reduced

V.7. Have working models been developed for wildlife-friendly forest management?

(activity 3.1.1.1 Workplan for the implementation of non-AHM related actions (2018-2020) agreed at the 3rd EGM IWG meeting in Leeuwarden, the Netherlands in June 2018)

[Only for Finland]

Please select only one option

Yes

No

Please provide details on the working models developed

>>>

Are these models being implemented?

Please select only one option

Yes

No

Please provide more information on the progress

>>>

Have these models been promoted to reach forest owners?

Please select only one option

Yes

No

Please provide more information

>>>

Please explain the reasons

>>>

Have these models been promoted to reach forest corporations?

Please select only one option

Yes

No

Please provide more information

>>>

Please explain the reasons

>>>

Please explain the reasons

>>>

Please explain the reasons

>>>

V.8. Please indicate the implementation progress to reach the annual goals for mire restoration

(activity 3.1.2.1 Workplan for the implementation of non-AHM related actions (2018-2020) agreed at the 3rd EGM IWG meeting in Leeuwarden, the Netherlands in June 2018)

[all Participating Range States]

>>>

Result 3.3: Breeding, staging and wintering habitats are not further lost due to oil and gas or renewable energy developments

V.9. Are you monitoring the collision risk posed by renewable energy developments to TBG close to the Special Protection Areas, identified as their important wintering sites?

(activity 3.3.1.1 Workplan for the implementation of non-AHM related actions (2018-2020) agreed at the 3rd EGM IWG meeting in Leeuwarden, the Netherlands in June 2018)

[only for Denmark and other Range States as applicable]

Please select only one option

Yes

No

Please provide information on the relevant actions that have been undertaken

>>>

Please provide any results, if available

>>>

Please explain the reasons

>>>

Result 3.4: Impact of agriculture on natural Taiga Bean Goose habitats is minimized

V.10. Has the area of managed coastal grasslands under the Common Agricultural Policy (CAP) increased in your country compared to 2017?

(activity 3.4.1.1 Workplan for the implementation of non-AHM related actions (2018-2020) agreed at the 3rd EGM IWG meeting in Leeuwarden, the Netherlands in June 2018)

[only for Finland]

Please select only one option

- Yes
- No

Please indicate the size of the total area

>>>

Please indicate the additional area managed since the beginning of 2017

>>>

Please describe the activities undertaken on grassland management

>>>

Please upload relevant documentation and provide weblinks

>>>

Please explain the reasons

>>>

Other objectives and results as decided by the EGM IWG

Review factors possibly contributing to rapid declines in eastern England and implement appropriate management responses

V.11. Have possible factors causing population declines in eastern England been reviewed?

(activity 3.4.2. Workplan for the implementation of non-AHM related actions (2018-2020) agreed at the 3rd EGM IWG meeting in Leeuwarden, the Netherlands in June 2018)

[only for UK]

Please select only one option

- Yes
- No

Please describe those factors and provide further information as available

>>>

Are appropriate management responses to these factors being implemented?

Please select only one option

- Yes
- No

Please provide information on the activities implemented

>>>

Please provide information about the main achievements and results

>>>

Please explain the reasons

>>>

Please explain the reasons

>>>

Reducing Taiga Bean Goose crippling

V.12. Have you undertaken any activities in the past three years to reduce TBG crippling rates?

(activity agreed at the 1st EGM IWG meeting in Kristianstad, Sweden in December 2016)

[all Participating Range States]

Please select only one option

- Yes
- No
- Not applicable

Please provide details on the activities

>>>

Please explain the reasons
