**12 out of 14 countries** (as of 31 May 2021, 86 % )

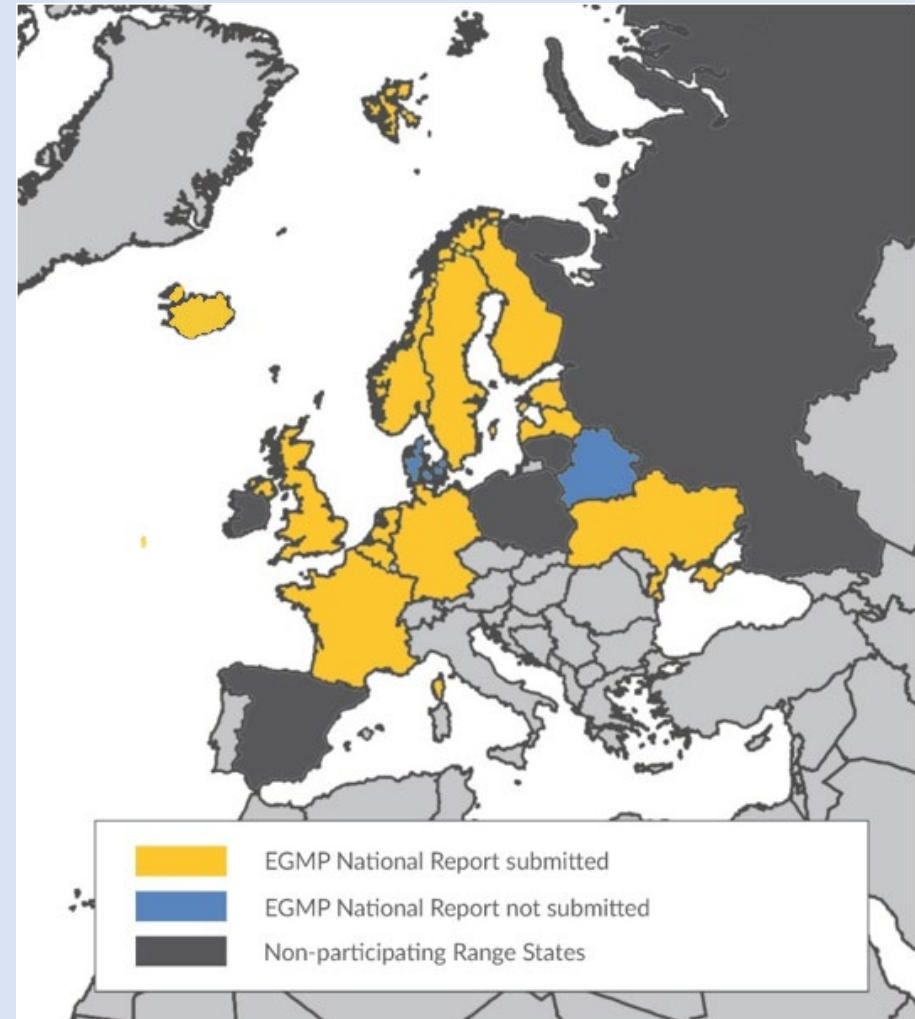

Belgium, Estonia, Finland, France, Germany, Iceland, Latvia, Netherlands, Norway, Sweden, Ukraine and UK

### Not submitted:

Belarus and Denmark

### Non-participating Range States:

\*Ireland, Lithuania, Poland, Russia, \*Spain

## Recommendations

- Format is updated according to the workplans that have been developed by the EGMP Task Forces and to include a section for the Barnacle and Greylag Goose respectively
- Take note of document AEWA/EGMIWG/6.5, and the proposal for a new process and format
- RS monitor the effectiveness of the management measures that are applied, and that experiences are shared within EGM IWG through the EGMP Agriculture Task Force
- Strengthen the **identification skills** and **raise awareness** of the status of different goose species amongst hunters
- Urgent need to **improve monitoring** and **data collection** in **Eastern MUs of the TBG**
- **Communicate** the activities and results that have been achieved in terms of TBG conservation, e.g. through a shared **EGMP communication strategy**
