# STATUS REPORT OF THE AFMP FOR RBG

*AEWA/EGMIWG/8.6 – Eva Meyers & Gitte Høj Jensen*

Barnacle Goose Russia Population AFMP Process
Doc. AEWA/EGMIWG/8.6

# Introduction

- The purpose of this document is to keep an overview of the AFMP implementation status

-  Ensure that progress as well as any issues are tracked and identified

- This overview shall be a dynamic document that is updated periodically and submitted to each EGM IWG meeting within the 6-year cycle

- Includes an overview of the activities that are conducted on an annual and triannual basis

# AEWA European Goose Management Platform

Barnacle Goose Russia Population AFMP Process
Doc. AEWA/EGMIWG/8.6

AFMP Barnacle Goose

**EGM IWG4 June 2019**
- AFMP process agreed
- MUs agreed

**EGM IWG5 June 2020**
- 1st Draft AFMP ready for adoption
- FRVs agreed

**EGM IWG6 June 2021**
- Review and adopt complete AFMP, including missing sections
- FRVs finalised
- Population model (IPM) expanded to MUs 2 and 3
- Pilot impact model developed for 2 countries

**EGM IWG11 June 2026**
- Evaluation and revision of AFMP

## PROCESS

**International Single Species Management /Action Plan 12 y cycle**

**Adaptive Flyway Management Programme 6y cycle**

**Population Status and Offtake Assessment Report 1/3y cycle**

**National Action Report + Indicator Status and Assessment Report 2/6y cycle**

&

**Task Force Report 1y cycle**

## AFMP

**6 year cycle of evaluation and adaptation related to:**

- Management Units
- FRVs
- Box 1
- Population models
- Cumulative impact models of derogation and legal hunting
- Damage Impact models
- Protocol for the iterative phases
- The range of and methods for indicators and programs
- The state of indicators and evaluation towards achieving objectives

**3-year cycle related to:**

- Assessing whether the population size and its MUs are below the 200% threshold and approaching the FRP.
- Assessment of the cumulative impact of derogation and legal hunting
- Coordination of offtake under derogation and hunting if the population and its MUs is below the 200% threshold and approaching the FRP.
- Taking coordinated conservation measures, if necessary.
- Increase understanding of population dynamics
- Refine models of population dynamics

**1 year cycle of:**

- Monitoring of indicators related to population models
- Update and report on work plans for the Task Force, Data Centre, AEWA Secretariat and Range States

**AFMP**

**6 year cycle of evaluation and adaptation related to:**

- Management Units

- Box 1
- Population models
- Cumulative impact models of derogation and legal hunting
- Damage Impact models

- The range of and methods for indicators and programs

# AFMP elements - Relax

- *Fiscal and personnel resources are in place, and the element is only evaluated and adapted, if the Range States see a compelling reason for doing so and/or new scientific knowledge suggests a re-evaluation*

## AFMP

**6 year cycle of evaluation and adaptation related to:**

- FRVs

- Protocol for the iterative phases

- The state of indicators and evaluation towards achieving objectives

# AFMP elements - Take note of

**AFMP**

**6 year cycle of evaluation and adaptation related to:**

- **FRVs**

- Protocol for the iterative phases

- The state of indicators and evaluation towards achieving objectives

# AFMP elements - <span style="color:red">Take note of</span>

- Gap-filling of FRVs before EGM IWG 2026.

**AFMP**

**6 year cycle of evaluation and adaptation related to:**

- FRVs

- **Protocol for the iterative phases**

- The state of indicators and evaluation towards achieving objectives

# AFMP elements - **Take note of**

- Protocol of damage assessment

- Protocol of indicator assessment

## AFMP

### 6 year cycle of evaluation and adaptation related to:

- FRVs

- Protocol for the iterative phases

- **The state of indicators and evaluation towards achieving objectives**

## AFMP elements - Take note of

- Data for each year from the period of 2020 – 2024 is to be reported to the EGMP Data Centre
