

## Task Force Day – Communication/webinars

*Ingunn Tombre, and all Task Force Members*

## Discussion points (communication/webinars)

- 1) What to improve?
- 2) Where to focus?
- 3) How to engage national stakeholders?
- 4) New webinar topics
- 5) Other ideas

## 1) What to improve? **Communication**

### **Can we have more joint-activity meetings?**

- Overlapping issues; some are not species-specific...
- Members (several) are members of more than one task force

### **All members should attend the online-meetings...**

- Difficult to find a date that suits all...
- Impossible...?

## 2) Where to focus?

Always useful with **shared information** from The Data Centre and the Secretariate

Follow the processes at the **current stage** in the AFMPs?

Extended «**Round Table**» in the TFs occasionally (at least useful in the AGRI TF)

**Task-force-dependent...** (merge task forces?)

## 3) How to engage national stakeholders? (that also are very busy...)

 Establish **a national network**? (Range-State-dependent...)

Remind about **notes online** after each TF meeting?

Produce “**highlight-documents**” at a regular basis?

Invite to **webinars** (and potentially communicate afterwards)

**Informal information** from TF-members to established contacts

“**National Theme Day**” (may need some resources...) (DK success example)

Produce **Briefing Notes** (on specific themes)

## May need to approach different stakeholders differently

### Different “groups”

**Want** to be involved

Do **not want** to be involved (but **has opinions...**)

Do **not want** to be involved (has **no opinions...**)

Want to be **more involved**

## 4) New webinar topics (I)

### **Goose monitoring**

Methods, challenges, harmonization, experiences, recommendations

### **Damage monitoring** *(fundamental objective)*

How to quantify and monitor crop damages?

*(some of this already covered by the presentation from Sweden in the previous webinar)*

### **Conflict monitoring**

Bring more social sciences on board?

## 4) New webinar topics (II)

### **Aircraft safety / bird-strikes** *(fundamental objective)*

Much experience and knowledge from several airports!

A “network” already exists

Scaring devices

Farmland management near airports

*(civil airport authority in Norway wants to learn and be more involved in EGMP!)*

## 4) New webinar topics (III)

### **More about crop damage and conflicts?**

Sociological studies

***“Produce best practice guide on establishing refuge areas”***

*(size, management, subsidies)*

**“Urban” geese** – how to manage!?

**There will always be new and relevant papers which may be presented!**

## 4) New webinar topics (IV) – by invitation?

**How to coordinate the offtake in derogations?**

**Technical workshop/webinar – methods in the model development, etc**

## Meetings within the EGMP (all TFs and IWG members)

### **How do the national network function?**

What is needed, what do not work, success criteria

### **Best practice in communication**

How to communicate from decision to implementation?

### **“The flow” of data collected in EGMP**

From a harvested or counted goose to model implementations and outcome

## 5) Other ideas
